PRE-PERMANENT MAKEUP PREPARATION

All permanent cosmetic procedures are a multi-session process. You are required to come back for at least one touch-up visit before it can be determined that your work is complete. Touch-up visits are scheduled at approximately 4-6 weeks intervals or longer.

Be prepared for the initial color intensity of your procedure to be significantly sharper, brighter or darker than what is expected for the final outcome. It will take time for this transition based upon how quickly the outer layer of your skin exfoliates.

Please read and understand the following:

- Since delicate skin or sensitive areas may swell slightly or redden, some clients feel it is best not to make any social plans for a day or two following any procedure. It is always best to avoid these procedures within months prior to important life events such as weddings. Procedures may take longer than expected to be completed under some circumstances.
- Wear your normal makeup or bring your brow pencil to your consult, but you do not have to for your procedure. Please do not wear mascara to an eyeliner procedure.
- Any tweezing or waxing should be done at least 48 hours prior to the procedure, electrolysis no less than 5 days before. Do not resume ANY method of hair removal for at least two weeks.
- Any eyelash or eyebrow tinting or eyelash curling should be done no sooner than 48 hours before, or two weeks after the procedure.
- Do not wear contact lenses during or 48 hours following the eyeliner procedure. Please remember to bring your glasses. You may resume wearing your contact lenses as soon as your eyes return to their pre-tattooed condition.
- Following the eyeliner procedure, as a safety precaution, we recommend that you have someone available to accompany you or drive you home.
- Refrain from the use of alcohol, aspirin, aspirin-containing medications, ibuprofen or other blood thinning medications for seven days before and two days after any procedure. Refrain from judgment-altering drugs for at least 48 hours prior to any procedure. No medications should ever be discontinued without first consulting your physician. A skin patch test is offered upon request.
